Accelerated Production

Cogan®
Since 1901

HOW WE WORK

WE'VE BEEN AROUND SINCE 1901 BECAUSE WE TAKE CUSTOMER SATISFACTION VERY SERIOUSLY. WE HANDLE EACH AND EVERY ORDER WITH THE TIME AND ATTENTION IT TAKES TO DO IT RIGHT. THAT EXTRA 'TLC' MEANS YOU'LL ALWAYS GET A SUPERIOR QUALITY PRODUCT THAT FITS YOUR EXACT NEEDS.

Step 1: RFQ/Estimation

The first step in working with Cogan is to submit a full description of your project requirements as well as a layout. Within 24 to 48 hours, you'll receive a detailed estimate complete with preliminary approval plans.

Step 2: Placing an Order

Once your quote has been verified, simply send us your purchase order referencing the applicable Cogan quote number and dollar value. You'll receive an order confirmation from our Credit Department within 24-48 hours (this time includes order entry and credit approval).

Step 3: Engineering & Approval Drawings

No matter the size or dollar value, every custom project we receive gets an approval drawing (except QuickShip orders). It's just responsible manufacturing and we want your order to be perfect.

Feel free to give our Engineering Department a call and leave a detailed voicemail at any time. Any questions or requests will be addressed within 24-48 hours.

Step 4: Production

Once you've signed your approval drawing, your order is scheduled for production. You'll receive an automated shipping window within 48 hours. Production time varies based on the dollar value and complexity of your order.

For current lead times, please visit our website, www.cogan.com/Our-Expertise/How-We-Work.

Step 5: Shipping

We have years of experience shipping orders all over the world and have a number of tools at our disposal to accommodate your needs. We work closely with international transport brokers to get you the best possible freight rate right from the quoting stage. We can ship your order by:

- LTL Standard (most economical, specific delivery time cannot be requested)
- LTL Time Keeper (guaranteed delivery for time-sensitive LTL shipments, available at an additional charge)
- Dedicated Truck (full closed trailer or flatbed, specific delivery time can be requested)
- Train (longer transit times may apply)
- Boat (customer will make arrangements with their own ocean freight forwarder, but Cogan will load the containers)

If you prefer to make your own shipping arrangements, we will provide the total weight, estimated skid dimensions, and any other information you might need to source your own transport. All you have to do is make a pick up appointment with our Transport Department..

Step 6: Material Reception & Staging

Every order that leaves our facility is carefully photographed before and after it has been loaded onto the truck. Shipping photos are sent before your material arrives. You'll know exactly what to expect so you can equip to unload and prepare a staging area.

(In order to avoid any scheduling conflicts, please book your installation team only after the material has been unloaded and staged.)

NATIONWIDE SUPPORT

WITH SERVICE SUPPORT ACROSS NORTH AMERICA AND A SUPERIOR PRE-ENGINEERED SYSTEM, NOTHING INSTALLS FASTER THAN THE COGAN LINE OF PRODUCTS.

- | | |
|------------------------|-------------------|
| 1 Montreal, QC | 8 Bluffton, SC |
| 2 Toronto, ON | 9 Plainfield, IL |
| 3 Haverhill, MA | 10 Thornton, CO |
| 4 Livingston, NJ | 11 Seattle, WA |
| 5 Pittsburgh, PA | 12 Riverside, CA |
| 6 Waterford, MI | 13 Tulsa, OK |
| 7 New Philadelphia, OH | 14 Nuevo Leon, MX |

Step 7: Installation & Support

The Cogan pre-engineered system is designed for ease of installation, accuracy and superior quality. We draw from millions of dollars' worth of raw material and work-in-process inventory to manufacture your order exactly how you want it. This standardized system allows for precision results and fast installation.

Our network of reps and independent installers have years of experience working with Cogan products. Installations are completed quickly and accurately with minimal interruption to your workflow. If your project is anywhere in North America, we can have a professional team on your job site in no time.

CUSTOMER CARE

If you require assistance at any point after your order has been placed, our responsive Customer Care Team is at your service. Contact them any time.

MEZZANINE
EXPERTS

Think it
We can build it

AT COGAN, WE ARE THE MEZZANINE EXPERTS. WITH OVER 100 YEARS OF MANUFACTURING EXPERIENCE, THERE'S NO PROJECT WE HAVEN'T SEEN.

Whether you need additional space in your warehouse, parts department, office, or retail store, there is always a good reason to install a Cogan mezzanine. Faster than you ever imagined possible, we can build an industrial strength mezzanine around the existing layout of your facility, matching its exact height, area and load requirements.

Cantilever Racking

Store Any Size, Any Shape

Think it
We can build it

IDEAL FOR STORING SHORT, LONG OR AWKWARDLY-SHAPED ITEMS, COGAN CANTILEVER RACKING OPTIMIZES THE PRODUCTIVITY AND PROFITABILITY OF YOUR WORK ENVIRONMENT.

Photo: Cantilever Racking for Metal Tube & Piping Storage

Designed for outstanding strength and durability, our cantilever racking features a special arm system that allows for easy front loading without obstruction. From tubing and piping to plywood, dry wall, steel sheets and lumber, Cogan cantilever racking is the perfect system for oversized storage.

Structural steel components guarantee superior strength. Punched holes run the full height of each column for excellent adaptability and adjustability. Built for the toughest industrial applications, all connections use high-strength structural grade bolts.

Guardrails

A Safe Workplace

Think it
We can build it

TRUBLE-FREE FOR YOUR PEACE OF MIND. PROTECT YOUR PEOPLE AND YOUR PROPERTY FROM THE GROUND UP WITH COGAN GUARDRAILS, SAFETY RAILS AND RACK PROTECTORS.

Use Cogan guardrails to safeguard conveyor systems, manufacturing equipment, electrical panels, computer stations, staircases and walkways, in-plant offices, first aid and restroom areas, rack posts and rack-aisle-ends, or anywhere else crash protection is required. The all-steel construction works around the clock to keep your workplace safe, productive and profitable. All guardrail solutions feature simple nut-and-bolt connections for easy and fast assembly. You benefit from a safer work environment that protects your people, products and profits - securely and reliably.

Lockers

Lock-It-Up

Think it
We can build it

FROM TENANT AND WAREHOUSE STORAGE TO EMPLOYEE, DORMITORY, MILITARY AND EQUIPMENT STORAGE, COGAN HAS THE PERFECT LOCKER SYSTEM TO FIT YOUR NEEDS, YOUR APPLICATION AND YOUR BUDGET.

The open wire mesh a design ensures your property remains in constant view while allowing air to circulate and light to penetrate fully. With fewer components, installation is fast and easy. Lockers can be assembled using basic hand tools, eliminating the need for skilled labour. Durable powder-coated or electro-galvanized finish is wear-resistant and maintenance-free. Your system looks great even after years of use.
