To ensure proper door closure and installation, center to center spacing of the post is critical. The dimensions on the installation drawing must be respected +/- 1/8”

Step 1 Centerlines
Using a chalk line, mark out the centerlines of each post (refer to installation drawings).

Step 2 Anchors
Anchor the foot plates to the floor using wedge bolt anchors (not provided). 3/8” x 2 3/4” for 2”x2” post 5/8” x 4 1/2” for 2”x6” and 2”x4” post.

Step 3 Side Panels
Attach each side panel on posts using carriage bolts in all the pre-punched holes.

Baseplates are usually offset when against a wall or in a door opening. Refer to installation drawing for the location and orientation of each one.
STEP 4
CONNECTING SIDE PANELS
Connect panels together using 3/4” carriage bolts in all the pre-punched holes.

OPTIONAL PART
FLEX PANELS
Fasten Ø 1/4” hex head tek screw from the inside of partition post to attach the flex panel.

WALL BRACKETS
Use tek screw to fasten the brackets to the posts and anchors for the walls (not provided).
Refer to installation drawings for specific emplacement and quantity.
